

## Mecha 2 DISPATCH PROTOCOL (PC)

*Note: adding »-lang« throws the localized version if present.  
Example: !pcwing-de shows German description.*

Hello **C**, need fuel?

*(If Mecha didn't throw the question already:)*

**C**, are you on emergency oxygen ? (blue countdown timer top right)

!cr **C**

*(If C's IRCnick not CMDR name)*

**C**, your in-game name?

!cmdr **C** (NAME) *(If Epic rescue do !epic as well)*

**C**, which system?

!sys **C**

**C**, PC or XBOX?

!pc / !xbox **C**

!grab **C** (former Cs line), in case of Mecha 1 even better instead:

!inject **C** <system> | <platform> | <oxy ok/ C-R x:xx>

*(CR or if enough time)*

**Rat1** please confirm client's location via GalMap.

*(if wrong sys)*

!inject **C** corrected system <system>

*(not in CR)*

!prep **C**

*(CR)*

!pcquit **C**

*(CR)*

**C**, stay in main menu until i explicitly tell you to log in. You know how to send wing requests and drop beacon?

Go **Rat1 Rat2**

Stand by/down

!assign **C Rat1 Rat2** *(!go works same)*

*(if a rat stands down)*

!unassign **Rat2**

!pcfr **C**

*(CR)*

Please log back to Open play. Quickly send wing requests and drop beacon as follows.

Now please add the rat to your wing and drop your beacon

!pcwing <b>C</b>
!pcbeacon <b>C</b>
Did you add the rat to your wing ?
<b>Rat2</b> please chain the wing with <b>Rat1</b> to avoid any further complication.
<i>(In case of No option to wing with Rat:)</i>
<i>(This should be done by a good Rat in any case)</i>
<b>Rat1</b> , please check if client is in Open: Comms -> Friend tab, Player in solo and main menu are tagged as [Solo Play] or [Main Menu]
<i>(Alternative, not that smooth though)</i>
<b>C</b> , are you in Open Play? Press ESC to check.
<i>(In case of INSTANCING; read the manual for alternative approaches)</i>
<b>C</b> can you please power up your trusters, your FSD and try to jump to SC for 10 seconds to get away from the sun.
<i>(If client »cannot jump« and is not CR)</i>
<b>C</b> Please un-target any destination system (press 1 for the nav panel). You need to do a local supercruise jump, not hyperspace. If present, you can target the upmost [ ] UNKNOWN local object or the local star.
<i>(in case of many rats/cr)</i>
<b>Rat1</b> you're lead rat for this op; make calls based on what happens in-game once we give the go
<i>(Debrief and sy)</i>
<b>Rat1</b> , great job! db+pw.
!clear <b>C</b>
<b>C</b> , you are welcome. Recommend the Fuel Rats!

**Recommendation for User Commands (HexChat) to make Dispatch's life easier. »/[term]« is the command that would trigger text insertion**

*Note: Some commands will become redundant under Mecha2.*

**/hello** say Hello %2, need Fuel? If so, please tell us the system (full name) you are in and whether you are on PC or XBOX.

*More rattish version, by Kerenn:*

**/why** say Why Hello there, Commander %2. I'll be your Dispatch for the evening. You need fuel? Good. Make yourself at ease by disabling every module except life support, grab a cup of Insty-Bruu and relax, one of my Rats will be with you in a jiffy.

**/hello2** say Hello %2, are you on emergency oxygen (blue countdown timer top right)?

**/o2** say %2 : Please note down your current system and distance to star and quit to the main menu. Please don't log in until I explicitly tell you to do so.

**/pc** %2 please tell us whether you are on PC or XBOX.

**/fr** say please add the rats %3 %4 %5 to your friends. To add a rat to your friends list press ESC and go to 'add friend' and search for the rats CMDR name.

**/wing** %2, Now please add the rat to your wing and drop your beacon

**/sc** %2, please power up your trusters, your FSD, point your ship away from the sun, UNTARGET any destination system (or target the local sun or any planet instead if present, press 1) and try to jump to SC for 10 seconds.

**/ratchat** say %2, please type /join #ratchat . We need this channel for rescue communication only.
